Diamond snowflake unit cells, drawn from the unit_cell_3.mph geometry definition
white = hole (center + 6 periodic images), red = rhombus unit cell, orange = narrowest slab bridge

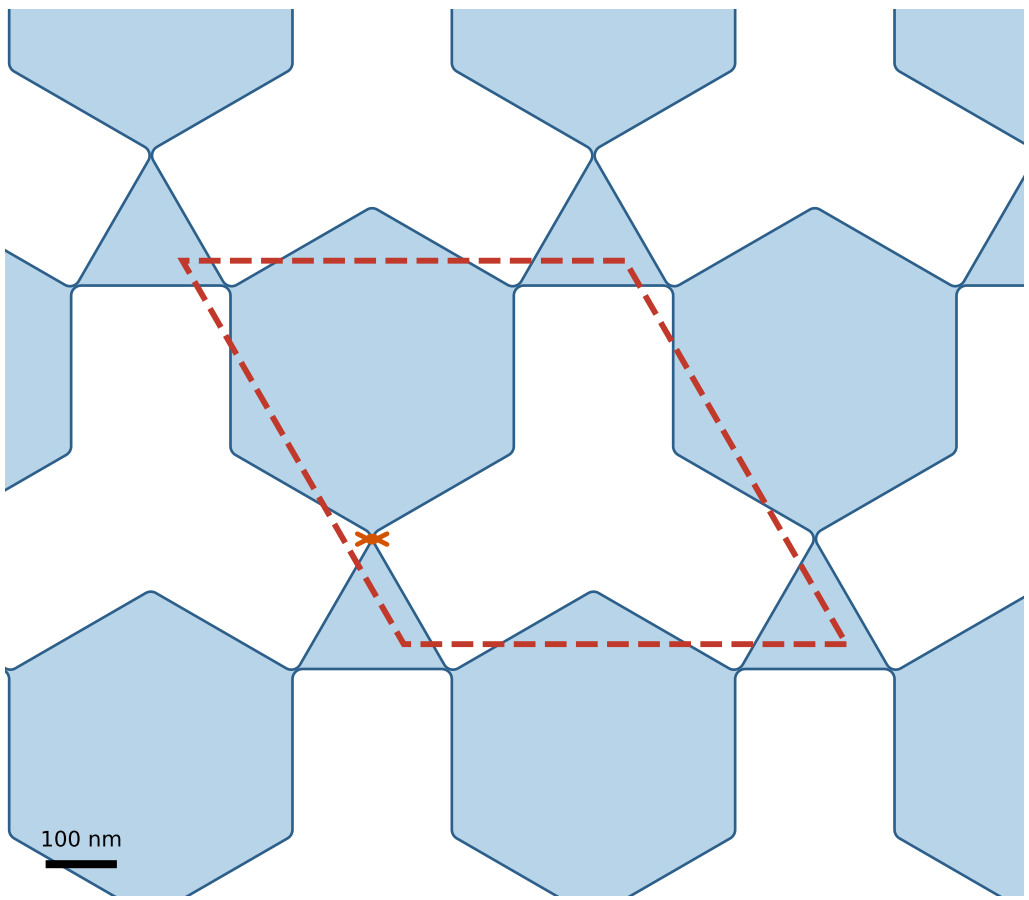

d/a=0.48, w/a=0.36 at a=200 nm   (d=96, w=72, f_r=16 nm)
narrowest bridge = 9.5 nm; fits rhombus cell (clearance 1.9 nm)

d/a=0.43, w/a=0.41 at a=200 nm   (d=86, w=82, f_r=16 nm)
narrowest bridge = 21.8 nm; fits rhombus cell (clearance 7.3 nm)

d/a=0.48, w/a=0.36 at a=700 nm   (d=336, w=252, f_r=16 nm)
narrowest bridge = 3.8 nm; does NOT fit any rhombus placement (dashed = default cell)

d/a=0.43, w/a=0.41 at a=700 nm   (d=301, w=287, f_r=16 nm)
narrowest bridge = 46.9 nm; fits rhombus cell (clearance 18.1 nm)
